

Top Ten Wind Turbine Sites in Santa Barbara County

This map assesses the top ten placement sites for wind turbines in Santa Barbara County, based on the following criteria: road access, proximity from airport and urban areas, not within fire hazard zones or on public lands, and wind power density (over 6.4m/s). The ten sites listed here meet all of these criteria, and are ranked by area (i.e. site 1 is this single parcel with the highest area that meets all of these criteria).
